Data from **SPACEX** and 

Space is vast. Now it's yours to explore.

Whether you're a student or just curious, GalaxyMaps guides you through the stars and helps you discover awesome places.

Plot your course.

Travel from Earth to Mars, or venture beyond.

Let Grok guide you, or take exploration into your own hands.

Explore in your browser.
Step inside with VR.

Bring the universe into the classroom.

Explore in a browser, or step into the stars with any WebXR-compatible VR headset.

Let curiosity lead.

Ask questions. Navigate by voice. Learn as you explore.

Making space accessible to all.

Both keyboard and voice controlled navigation, larger text, high contrast, and reduced motion.

Apple Vision Pro demo · GalaxyMaps in the spatial browser

"Grok, take me to Saturn and tell me more."

Your navigator. Your astronomy tutor. Your companion through the cosmos.

Grok combines scientific knowledge with voice navigation, turning every destination into a hands-on lesson.

Ask why Mars is red, how the Sun produces energy, or why light can't escape a black hole.

With immersive visuals and Grok beside them, students can move through space, examine worlds up close, and connect each explanation to what they see.

Apple Vision Pro · immersive view with the Grok mic HUD

GalaxyMaps on Apple Vision Pro · spatial exploration with natural interaction

Space should be accessible to everyone.

Voice-controlled navigation

Explore and ask questions hands-free.

Accessible by design

Keyboard controls, larger text, high contrast, and reduced motion.

One universe. Many ways to explore.

Browser, VR, voice, touch, mouse, or keyboard.

Where would you go?
